| <p>Course Highlights: Structured Training System Continuous Training Solution Best Practices 10 Point Blueprint for Success Qualities of Work Ethic Maximizing Production Tips for Success Secrets for Top Performance</p> <p>Maximum Impact: Our training content leverages modern neuroscience that is proven to deliver maximum impact and content retention.</p> <p>Minimal Cost: For the price of one drill bit, we will provide your employee with effective training, over a period of months, not days, or indefinitely should you choose.</p> | <p>Introduction:</p> <p>PRO certified employees are considered to be the upper echelon in their respective roles. PRO training is an online training & coaching system that is being adopted as the standard in producing CNC shop employees that are highly productive. Considered a "zero footprint" system, we are able to provide continuous training to employees with little to no impact to your businesses production schedule. User paced means that employees can proceed at whatever speed works best for them with no pressure. Most sessions have requirements such as quizzes or assignments that participants are required to pass before the next training session</p> <hr/> <p>What to Expect:</p> <p>Participants will display a range of positive benefits including increased initiative, responsibility, and confidence in their work. They will thoroughly understand what is expected of them in their role, take more pride in their work, maintain a clean and orderly workspace, and produce at a higher level.</p> <p>Minimal Cost:</p> <p>For the price of one drill bit, we will provide your employee with highly effective training, over a period of months, not days, or indefinitely should you choose.</p> |

Level 1: Entry Level/Mid Level (Operator PRO)

Certified **PRO** Operators are considered to be the upper echelon in their respective roles and possess the key technical & interpersonal skills to make them exceptional employees. Perfect for employees with the primary responsibility of CNC Machine Operation, as an onboarding training for new Operators or to correct underperforming CNC Machine Operator performance. Success participants will have a deep understanding of their role & responsibilities and operate with confidence. There are 3 separate courses included at this level to provide the broad knowledge base necessary to excel in this role.

Level 2: Mid Level/Intermediate (Set-Up PRO)

Set-Up **PRO** is the next step in the progression from Operator **PRO** by providing lessons on the key technical & interpersonal skills necessary for high performance CNC machine set-up. Set-up **PRO**'s are professional, reliable, organized and focused. There are 3 separate courses as part of this level to provide the broad knowledge base necessary for excellence in this role. Perfect for more experienced Machine Operators, as an onboarding tool for new hires for CNC Machine Set-up, or to correct underperforming CNC Machine Set-Up employees. Includes a simplified guide to CNC machine set-up, 10 point blue print for success & leadership coaching.

Level 3: Set-Up Level/Advanced (CNC)

Machining **PRO** is a deep dive into CNC machining (milling & turning) & the fundamentals of metal cutting. Participants will also be instructed on CNC machining concepts, problem solving, troubleshooting, and critical thinking as it relates to machine operation. Participants will learn to use a logical process for solving problems and troubleshooting CNC machining related issues such as chatter, surface finish, burrs, tool breakage, tool wear and more.
